PROFILE

Certified Ethical Hacker (CEH) and MSc Applied Cyber Security student with 1+ years of experience in IT operations, network security, vulnerability analysis, and infrastructure management. Skilled in penetration testing methodologies, vulnerability assessments, and secure network design. Proven track record of improving security posture through proactive threat detection, vulnerability remediation, and security awareness training.

TECHNICAL SKILLS

Cybersecurity Tools Proficiency: Burp suite, Tenable Nessus, Metasploit, Nmap with various scripts, OWASP zap, Acunetix, Snort, FTK Imager, Cryptool, Wireshark and many more**.**

Technical Expertise: Expert in Vulnerability Assessment, Foot printing & Reconnaissance, Enumeration, Network Penetration Testing, Web Application Penetration Testing, API Penetration Testing, Risk Assessment, Security Solutions, Threat analysis, Incident response and have a comprehensive knowledge of pen testing Mobile Application, wireless hacking etc**.**

Frameworks & Technologies: Proficient in using Kali Linux OS, Parrot OS, Windows OS, Android. Expertise in MITRE ATT&CK, OWASP Top 10 Frameworks used in Penetration testing.

Professional Competencies: Technical Reporting & Executive-Level Communication, Translating Complex Security Findings into Business Risk, Leading Security Tasks and Mentoring Junior Team Members, Cross-team Collaboration with Engineering and Management, Operating Effectively in High-Pressure Incident Scenarios.

WORK EXPERIENCE

Bekaert Industries Pvt. Ltd **IT Infrastructure and Security** **Sept 2024 – Sept 2025**

- Worked on Vulnerability Assessment and Penetration Testing (VAPT) across Network Infrastructure, servers, endpoints and CCTV-systems.
- Using tools like Nessus, Nmap, Burp Suite, OWASP ZAP, Metasploit, SQL map, and Wireshark, conducted manual and automated security testing.
- Detected and identified exposed services, misconfigurations and security weaknesses under guidance of OWASP Top 10 and CWE standards resulting in remediation and infrastructure hardening.
- Learned to prepare detailed reports containing vulnerability assessment, technical documentation and guideline for remediation, focusing on timely submission and audit readiness
- Worked in coordination with external stakeholders, management department, internal IT teams to support projects on security, compliance requirements and remediation guidelines.
- Gave assistance in Active Directory access control management, security operations and secure configuration of enterprise systems.
- Closed around 60 + IT security tickets per month while simultaneously maintaining compliance with organizational security policies and best practices.

Vishwakarma and Binghamton University (USA) **Cybersecurity Research Intern** **Jan 2024 – June 2024**

- Managed task allocation, timelines and technical deliveries, leading a team of Cybersecurity research team.
- Studied and analysed 10+ privilege escalation techniques mapping to the MITRE ATT&CK framework for real-world adversary behavior simulation.

- Evaluated and designed incident response strategies and countermeasures for defense based on attack simulation scenarios.
- Reviewed and document team research outputs to ensure consistency and technical accuracy across documentation.
- Kept academic mentors and stakeholders well informed about research progress and results.

One Stop AI **Cybersecurity Intern** **Jan 2023-Jun 2023**

- Conducted security testing including using protocol-based SMTP Open Relay analysis, DoS attack simulation and network traffic monitoring, using Metasploit
- Assisted in identifying attack paths, vulnerabilities and system weaknesses across network environments.
- Documented mitigation strategies, security findings and observations to support project reporting and learning outcomes.
- Built strong foundation on understanding of both offensive and defensive cybersecurity concepts.

PROJECTS

CWE-Based Security Threat Analysis Platform **Queens University Belfast**

Objective: To build a secure web-based prototype that analyzes CWE vulnerability data and demonstrates strong software assurance, architecture, and DevSecOps practices.

Outcome: Developed hands-on experience in secure application development, vulnerability analysis, and delivering security insights through a functional advisory system.

Deep Packet Inspection (DPI) Traffic Analysis System **Vishwakarma University**

Objective: To analyze network traffic at the packet payload level for detection of anomalous patterns, malicious activity and hidden threats in network.

Outcome: Proper visibility and scrutiny into network-layer threats by using deep packet inspection techniques, enabling early detection of malicious traffic.

Network Intrusion Detection System (NIDS) **Vishwakarma University**

Objective: To design and build a network-based intrusion detection system for monitoring traffic continuously and detecting threats.

Outcome: Successfully detected multiple attacks and abnormal behaviors patterns, improving efficiency of network security monitoring.

Cross-Site Scripting (XSS) Detection Tool **Vishwakarma University**

Objective: To identify and try to mitigate Cross-Site Scripting (XSS) attacks by user input analysis and HTTP requests in real time.

Outcome: Blocked approximately 90% of malicious payloads during tool testing and generated real time security alerts.

Web Application Clone (Security Analysis Project) **Vishwakarma University**

Objective: To learn and understand workflows, web application architecture and security controls by implementing and analyzing a functional application clone.

Outcome: Gained practical experience identifying client-side and architectural security weaknesses during analysis

EDUCATION

Queen's University Belfast **MSc in Applied Cyber Security** **September 2026**

- Expected Grade 2:1

Vishwakarma University **Bachelor of Technology- Computer Engineering** **July 2025**

- Grade A

CERTIFICATIONS AND TRAINING

- OSCP (In progress)
- Certified Ethical Hacker (CEH v12)
- eLearn Security Junior Penetration Tester (eJPT)

EXTRA-CURRICULARS ACTIVITY & ACHIEVEMENTS

- Try Hack Me (Top 2%).
- Participated in Center for secure Information Technology CTF Event.
- 1st Price — Kainos CTF Challenge
- Bug bounty award — Proton web application.
- Hall of Fame recognition — NASA web application (bug identified).
- Hall of Fame recognition — Wave HQ web application (bug identified).
- 2nd price — Visionary Techfest Hackathon (with Binghamton University, USA).
- 3rd Price — National IBM ICE Hackathon.
- Government of India acknowledgment for reporting CWE-287 vulnerability.

Research Papers

- "Cybersecurity in the Modern World: Ethical Hacking" , published in the International Research Journal of Modernization in
- Engineering Technology and Science. Volume:05/Issue:09/September- 2023
- "Tracing the Impact of GDPR on Global Data Privacy", International Journal of Science and Research (IJSR), Volume 13 Issue 9, September 2024
- "Security Incident Response Simulation Project: Social Engineering Attack", published in the Science Management Design Journal (SMD Journal), Volume 2, Issue 2, June 17, 2024
